Web developer

Chennai, India

## SUMMARY

A full-time student, passionate about web development and data analytics with machine learning and deep learning. While my technical skills are my foundation, I am also fascinated by the industry's business aspects. I am eager to expand my knowledge in strategic planning, market analysis, and product development to gain a comprehensive understanding of the business landscape.

## EDUCATION

### SENIOR SECONDARY

Velalar Vidyalayaa Senior Secondary School  
Percentage:89

### UNDERGRADUATE

SRM Institute of Science and Technology  
CGPA : 9.16

## SKILLS

- HTML5, CSS3
- Javascript
- C, C++
- Python3
- Data Analytics
- Machine Learning
- Deep Learning

## CERTIFICATIONS

- Data Analytics w/ Deep Learning from NUS
- AWS using SageMaker

## PROFESSIONAL EXPERIENCE

### Data Analyst

NUS, Singapore | June 2023

- Created an industrial-level project from scratch called PlayCluster.
- The project aimed to develop a web application that utilises Machine Learning and Deep Learning clustering models to cluster similar songs together and use the results to determine a Similarity Index between two playlists.
- Presenting my work to senior professors enhanced my technical skills. This internship at NUS solidified my passion for data science and prepared me for future endeavours in the field.

### Front-End Web Developer

Codechef Student Club | November 2022 - June 2023

- Made a few front-end projects.
- Attended workshops on Web3.0
- Helped to organise in-person events.

### Graphic Designer

Slug N Plug Student Club | October 2022

- Designed posts for Social Media page.
- Attended workshops on Designing.
